

COMPLETE MINING AND TUNNELING SOLUTIONS

Delivering complete mining and tunneling solutions through precision engineering, turnkey project execution, and dependable service partnerships that ensure long-term equipment performance and reliability.

Delivering reliability and performance through three specialized service verticals.

Our Service Portfolio

Comprehensive solutions engineered to deliver reliability, efficiency, and long-term value across every phase of mining and tunneling.

Turnkey Projects

End-to-end mining and tunneling execution.

Roka undertakes complete turnkey solutions from equipment deployment and site setup to ongoing operations and maintenance. Our teams integrate engineering expertise with on-site efficiency to ensure project readiness and sustained performance.

- Full-cycle project execution from concept to commissioning
- Equipment supply, installation, and operations
- Technical supervision and operator support

Refurbishments

Rebuilding performance. Restoring reliability.

Our refurbishment division brings new life to existing equipment through reverse engineering and OEM-grade reconditioning. Each rebuild undergoes rigorous inspection, and compliance checks to match OEM specifications.

- Reverse engineering and component reconditioning
- OEM or equivalent parts sourcing
- Safety certification and functional testing

Service Contracts

Keeping your operations running, always.

Roka offers flexible service models that minimize downtime and maximize output. With trained on-site engineers, rapid response systems, and preventive maintenance programs, we ensure reliability every day.

- Annual Maintenance Contracts (AMCs)
- Cost-per-hour and cost-per-meter models
- Preventive and predictive maintenance
- Skilled service teams stationed across India

Why Roka

- Proven expertise in mining and tunneling equipment
- OEM-standard refurbishment capabilities
- Nationwide service network
- Quick-response support teams
- Commitment to safety, reliability, and performance

Experience you can count on

- 189+ years of combined technical expertise
- 70+ skilled engineers and service technicians
- Operational presence across key mining zones in India
- Dedicated workshop and field service teams

About Roka

Founded in 2015, Roka Mining & Infra Solutions specializes in equipment rebuilds, refurbishments, and maintenance services for the mining and tunneling sector.

With over 189 years of combined engineering expertise, Roka has grown from a single-site operation into a trusted partner for end-to-end project execution, refurbishment, and field support across India.

Our workshop in Hyderabad is equipped for complete machine overhauls, backed by experienced engineers, field technicians, and a robust supply chain network ensuring minimal downtime and consistent performance.
